Note: This form is intended as a worksheet to assist in developing effective programs of concentrated study for majors in Biological Science. Students must identify a concentration before their Junior year in consultation with their advisor. The Self-Designed Concentration is subject to revision and modification by agreement between the student and the faculty advisor.

Student Name: ________________________________________________________________

Faculty Advisor: ______________________________________________________________

Concentration Title: ____________________________________________________________

**Student Description of Self-Designed Concentration**

A. Objectives – Briefly describe the objectives of the Self-Designed Concentration you have selected.

____________________________________________________________________________

____________________________________________________________________________

____________________________________________________________________________

____________________________________________________________________________

B. Components of the Self-Designed Concentration – Identify the courses you anticipate including in concentration. If specific courses have not been identified, indicate subject areas. The concentration must include biological science courses at the 600/700 level chosen in consultation with the advisor.

1. _________________________________________________________________________

2. _________________________________________________________________________

3. _________________________________________________________________________

4. _________________________________________________________________________

C. Advisor’s Comments: ______________________________________________________

____________________________________________________________________________

____________________________________________________________________________
