2017	1,824	825	412
2018	1,986	941	401

URC 2018 Student Participant Survey – Highlights

A total of 508 students responded to the URC 2018 Participant Survey.

- Of the 500 students who answered the question regarding how they had heard about the URC, **91% reported that they had heard about it from a faculty mentor/adviser**, underscoring the great influence that faculty mentors have in encouraging students to pursue this high-impact experience.
- Of the 483 students who answered the question regarding how the URC compared with other academic experiences at UNH, **34% of respondents reported that their URC experience was one of the top three most rewarding aspects of their UNH education**, while **93% reported that the URC was in their top ten**.
- Of the 486 students who answered the question regarding the degree to which their participation in the URC improved certain skills, at least **80% of respondents indicated that the URC allowed them to improve – or very much improve – in the following areas: 1) creating a clear, organized presentation; 2) communicating complex ideas to a general audience; 3) sharing ideas with colleagues in their field; and 4) developing a deeper understanding of their subject discipline.**
