

## Creative Coding with Scratch

Coding is a necessary skill for the 21st century. Within minutes, you and your students can learn how to code using a simple programming language, Scratch. You will leave with several examples of your own code that you can use in your classroom, plus "unplugged" activities that support both state standards and computational thinking. (K-12)  
Instructor: Laura Nickerson

**Saturday, November 4**

UNH STEM Discovery Lab at Manchester  
Pandora Building, 88 Commercial Street  
Manchester, NH  
9:00 am to 3:30 pm

### COST INFORMATION
